

Response distribution diagnostics

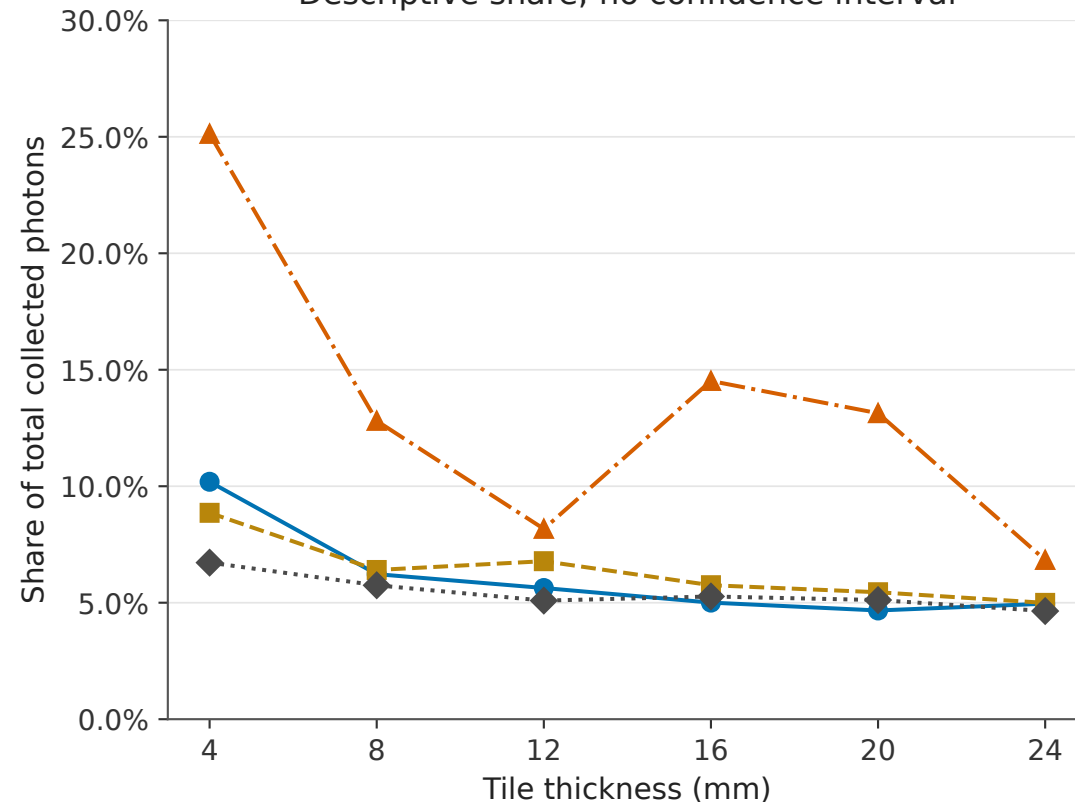

Zero responses and the contribution of the ten largest events in each 1,000-event configuration

- Back: four
- Back: diagonal two
- Back: center one
- Side: two (+X)

Zero-response events
95% descriptive intervals

Collected light from the largest 1% of events
Descriptive share; no confidence interval

N = 1,000 neutrons/configuration (10 x 100); 24,000 total. Pooled whole-event percentile bootstrap, B = 10,000.

Separate percentage scales, both starting at zero. Right panel is descriptive; no observations are omitted or synthesized.
