

Side-two thickness scan: historical and current samples

—◇— July: zero gap; N = 400 or 600 per thickness —●— Current: 0.5 mm gap; N = 1,000 per thickness

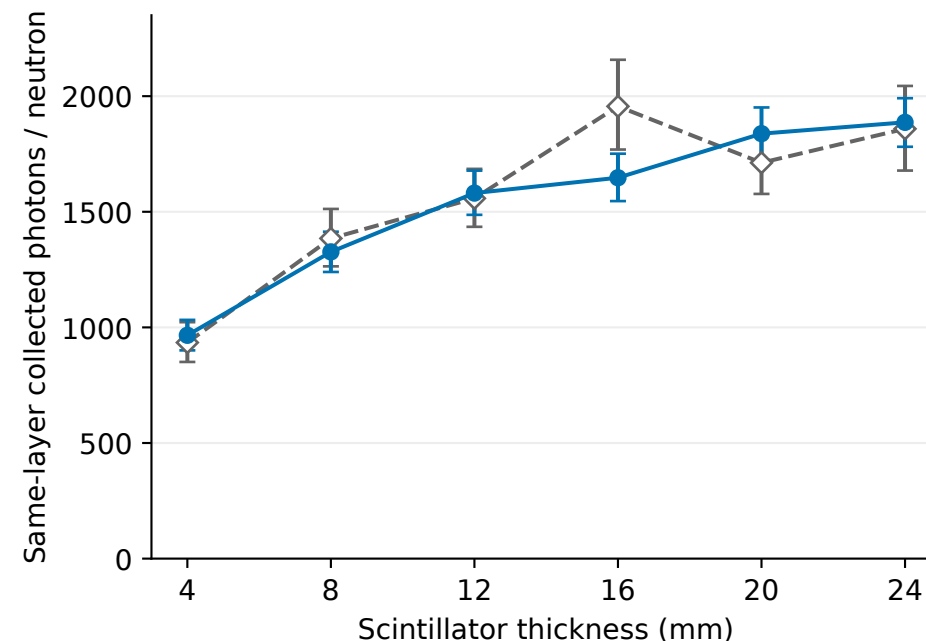

Production

Collection

Net response

Error bars: 95% whole-neutron-event bootstrap intervals (10,000 replicates). Historical N: 600 at 4/12/20 mm, 400 at 8/16/24 mm.

Different geometries and seed cohorts: this overlay does not isolate the effect of the air gap. Both samples have zero recorded cross-layer collection.
